

KISHAN KUMAR

AI/ML Engineer | Data Scientist

+91 9236076711 | Lucknow, Uttar Pradesh, India | kishankumar13580@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science undergraduate pursuing an entry-level position as an AI/ML Engineer or Data Scientist. Demonstrated ability to deliver end-to-end machine learning solutions, encompassing data preprocessing, feature engineering, model development (Scikit-learn, XGBoost), and production deployment (Streamlit). Additional working knowledge of deep learning (TensorFlow/Keras, PyTorch) and natural language processing (NLTK, spaCy, Transformers). Committed to applying sound analytical judgment and technical rigor to real-world business problems.

EDUCATION

Bachelor of Technology in Computer Science & Engineering (Pursuing)

Babu Banarasi Das University, Lucknow, U.P.

Intermediate (Class XII)

2022

H R I C Khalilabad, Sant Kabir Nagar (U.P. Board) | Result: 74%

High School (Class X)

2020

Kisan Inter College, Sant Kabir Nagar (U.P. Board) | Result: 80%

AI/ML & DATA SCIENCE SKILLS

Machine Learning: Regression, Classification, Model Evaluation & Tuning, Scikit-learn, XGBoost

Deep Learning: TensorFlow/Keras, PyTorch

Natural Language Processing: NLTK, spaCy, Transformers (Tokenization, Intent/Response Matching)

Data Handling & Analysis: Pandas, NumPy, Data Cleaning, Feature Engineering, EDA

Data Visualization: Matplotlib, Seaborn

Model Deployment: Streamlit, Model Serialization (JSON/Pickle)

Programming Languages: Python, Java, C

MACHINE LEARNING & DATA SCIENCE PROJECTS

Car Price Prediction | [Live Demo / GitHub](#)

2025

- Built an end-to-end regression pipeline in Python to predict used-car selling prices from features such as present price, kilometers driven, fuel type, seller type, transmission, and vehicle age.
- Engineered features (e.g., derived vehicle Age from manufacture year) and encoded categorical variables to improve model accuracy.
- Trained and tuned an XGBoost regression model, serialized it for reuse, and deployed an interactive prediction app using Streamlit.

Employee Salary Prediction | [Live Demo / GitHub](#)

2025

- Developed a machine learning model to predict employee salaries based on job-related and demographic features using an XGBoost regressor.
- Performed data preprocessing, feature engineering, and model evaluation to optimize prediction accuracy.
- Deployed the trained model as an interactive web application with Streamlit for real-time salary predictions.

AI Chatbot for Inclusion Awareness

Nov 2025

- Built an AI-driven chatbot using NLP techniques to promote and share information on social inclusion and awareness.
- Applied NLP methods (tokenization, intent/response matching) and backend integration to improve conversational accuracy and user interaction.

OTHER PROJECTS

Amazon Clone | [Live Demo / GitHub](#)

Jun 2025

- Developed a responsive e-commerce interface using React and CSS, replicating key features of the Amazon homepage, with functional components for dynamic data rendering.

Rock-Paper-Scissors Game

Jul 2025

- Built an interactive web-based game in JavaScript with logic implementation, DOM manipulation, and a clean, intuitive UI.

ADDITIONAL TECHNICAL SKILLS

Web Technologies: HTML5, CSS3, React, Vite, Node.js

Databases: MongoDB, NoSQL

Version Control: Git, GitHub

SOFT SKILLS

Teamwork & Collaboration, Communication, Problem Solving, Leadership, Team Management

HOBBIES / LANGUAGES

Hobbies: Exploring new technology in AI and Machine Learning | **Languages:** English, Hindi
